

**TWS A3 WIRELESS
EARPHONES WITH TOUCH
SENSOR**

Wireless pairing

Open the charging case, remove the earphones, and the headset will automatically turn on and pair. This process takes about 5 seconds (the red and blue light will flash quickly, but after the successful pairing, the red and blue lights will flash slowly).

To pair it with your smartphone turn on Bluetooth on your device and find A3-TWS, then click *Pair*. After approximately five seconds, the headphones will be paired, and the blue light flashes every five seconds.

If you want to use one headphone, take just one headphone out from the charging case and start process of pairing with your smartphone.

Charging

When you charge your charging case, the red light will flash. When the charging case is fully charged the red light will be turned on constantly.

The earphones will be automatically recharged when you put them in the charging case. During this time, the blue light of the charging case and the red light of the earphones will be turned on. After headphones are fully charged the indicator lights will be off.

Turn on/off

The earphones will be automatically turned off when you place them in the charging box. When you take them out they will turn on. When out of the charging case, long press the earphone for four seconds to turn them off, then if you want to turn them on, long press for three seconds.

Make a call

When the earphones are connected to the smartphone, you can make a call. During the incoming call, touch the earphone, answer it, or keep your finger on a headphone for a few seconds to reject it. During the call, tap the earphone to hang up.

Music

While you are listening to music, tap the earphone to pause the song, then tap it again to resume.

To turn the volume up tap the right earphone twice, to turn it down, tap the left earphone twice.

To play the next song long press the right earphone until you hear the “beep” sound, to play the previous do exactly the same thing, only with the right earphone.

Tips:

When only one earphone is connected to the smartphone, the other one is not connected by default. For binaural use, please delete paired device, turn off the Bluetooth on your phone, put the two earphones in the charging box then take them out and wait for five seconds until they pair. Then, turn on the Bluetooth on your smartphone, find A3-TWS, and click *Pair*.
