- 7. Audio interface
- 8. AVIN interface
- 9. USB
- 10.TF card socket
- 11.Power cable

Common problem

The FM transmitter has poor signal and noise interference.

- If the FM transmission signal is poor, you need to fix the car radio and plug in the antenna, and organize the wiring harness to avoid interference in the frequency band.

Wireless Carplay often disconnects or doesn't work.

- When connecting to Carplay, do not connect the phone to other wireless networks to avoid Carplay disconnection.

The bracket is not strong, the suction cup adhesion is not enough, and the adhesion is unstable under high temperature.

- When sticking, pay attention to keep the sticky position clean and dry to avoid the occurrence of bubbles and unstable stickiness when sticking.

The Bluetooth is out of sync, the caller can't hear the sound or there is noise.

Make sure that the mic position is not blocked by foreign objects.
