Usage instructions

1. Insert the microphone into the amplifier's MIC port, and wear it on your ear as shown in the right figure.
2. Turn on the "Switch", position the microphone near your mouth, attach the windscreen and speak. Adjust the "Switch" to a suitable volume.
3. While speaking, you can press the "Mute Button" at any time to toggle between amplification and mute.
4. Audio Input: When an audio cable is plugged into the "AUX" port, you can play music from the audio source device.
