

# Bluetooth Keyboard Case

## Keyboard instruction

### Keyboard connection operation:

1. Turn on the power supply, and the green indicator light will be lit for one second (if the instruction is red, please charge in time).

Press the matching key "Fn+ " for 1 second, the Wireless indicator lights flicker into the pairing state, and the effective time is about 120 seconds.

Open the Wireless search function of the external device, click the "Wireless Keyboard" search.

After the pairing is successful, the indicator lights go out, and you can use the keyboard.

2. If there is no operation in 10 minutes, the keyboard will go to sleep state and wait for 2~3 seconds with any key to wake up.

Note: please refer to the following instructions according to the actual functions of the keyboard:

(Partial product support) Please select the input program from the system of the corresponding device, press "FN+And/ Win/ IOS" for 1 seconds to switch, and the bluetooth light will light up when the switch is successful.

Fn+And is converted to Android ;

Fn+Win is converted to Windows;

Fn+iOS is converted to iOS.

## Disconnect the keyboard connection

If you want to break the connection between keyboard and device, please clear the pairing information in the device, or turn off the keyboard power directly.

## Electricity indicator:

If the power indicator light is red slowly, the power is low, please charge it in time, the red light is bright when charging. When the indicator is green, it is full, please disconnect the charging power to ensure safety.

**Function key:** when the key has more than one character or function icon, press Fn or Fn+Shift.

Note: Based on the open source nature of the operating system, different brands of devices may have some function keys inconsistent with the table or unresponsive. Unusual characters in IOS system please use with Alt or Alt+Shift, Please use the WIN/AND system with Alt Gr.

This icon indicates that the keyboard supports luminous function: (Partial product support)

By pressing this icon key, you can (turn on/Adjust the brightness/turn off) the luminous function of the keyboard.

If in the off state, press to turn on the luminescence, then press the brightness to increase 30%, then press the brightness to increase 30% again, then press again to turn off the luminescence; Loop through.

FN+ can adjust the luminous color, and switch between different colors in turn.

**Note:** If the light can not be lit, or immediately after the light off, please timely charge; If the battery capacity is below 20%, the keyboard will force this function off.

**Special note:** The battery life of the keyboard with luminous function is about 3-6 hours when the battery capacity is 100% (related to luminous brightness). Turn off the light for about 300 hours.

**Basic parameters:** (part of the parameters are objective factors will vary).

Working Voltage: 3.0V~4.2V

Working Time: 80 Hours

Sleeping Current: 0.3mA

Battery Capacity: 150mAh

Keyboard Lifetime: 300 Million Times

Connect Distance: 10m

Charging Current: 200mA

Charging Port: Micro USB (or Type-C)

Matching Password: No

Working Current: 3.0mA

Low Voltage Alert: 3.0~3.3V

Battery Standby Time: 100 Days

Keystrokes: 50g~70g

Charge Input: 5V 1A

Charging Time: 2~3 Hours

Awaken Time: 2~3 Seconds

Working Temperature: -10°C~+55°C

## **Common connection Troubleshooting:**

- Make sure the power is turned on and the battery is sufficient.
- Make sure that the keyboard is within the range of working distance.
- Make sure that the Wireless related function of the device has been opened.
- Make sure that the keyboard and the device have been paired.
- Clear device pairing record and turn off Wireless function; re match.
- Please do not connect multiple Bluetooth keyboards at the same time; if necessary, please connect one by one.
