Convertible 3-in-1 USB, Type-C & MicroUSB design.

Windows:

Download software via the link: www.kmoom.com/camera.rar and connect the camera to your computer. You can now start to take photos and record videos.

MacBook:

For MacBook OS, use Photo Booth, QuickTime Player, VLS (VideoLanClient)

Android:

Android users need to download software.

1. Download the app via the link: www.kkmoom.com/an97apk. You can also scan the QR-code, OTG SEE. Connect the camera and the software will start automatically.

2. Other third-party software can be downloaded from the Google Play Store, such as "Camerfi, OTG VIEW".

Important!

Android phones (Android 4.4 + system) and your own must support the OTH and UVC function.

- How to check OTG? You can install the free app "USB OTG checker" to accomplish this easily.
- Does not support Android 7.0+, iPhone iOS system Windows Phones, Blackberry, Motorola, Galaxy S8, Google Pixel smartphone.

Has a waterproof (IP68) camera, but please install the waterproof gasket.
