Operating instructions

Pairing the earphones

1. Take out both earbuds from the charging box, and they will connect with each other automatically. LED light of the right earphone flashes blue and red alternatively, while the left earphone won't light up at all.
2. Turn on the Bluetooth on your phone and pair it with the earphones.
3. After the first pairing, the earphones will pair with your phone automatically the next time you turn them on.
4. If pairing is not successful, please turn off the Bluetooth and delete the pairing records on the phone. Repeat the above operation! If pairing is successful, the mobile phone Bluetooth will turn on directly next time. Take up the earphone and touch the power key until the Bluetooth light is on. The automatic connection is now successful!

Using the earphones separately

After touching the power key on the earbud surface, press it again and don't release until the red and blue lights flashes alternatively. Turn on the Bluetooth setting of the mobile phone and click to connect.

Take out the other earphone and touch the power-on key. When it powers on, continue to press and don't release until the red and blue lights flashes alternatively. Turn on the Bluetooth of your phone and pair it.

Button mode and functions

1. Pause and play: Press the touch key on the earphone to pause. Press it again to continue playing.
2. Answering call: If there are incoming calls, press the touch key on the earphone to answer.
3. Reject the incoming calls: If there are incoming calls that you want to reject, hold the touch key on the earphone.
4. Next song: Press the touch key on earphone two times for the next song.
5. Power off: Hold the touch key on the earphone until the red light of the earphone is on. The prompt sound indicates power-off. When you turn off one earphone, the other turns off at the same time. But powering on must be done on each earphone separately.
