To set notification reminders on an Android phone do the following: on the Device Interface go to Message Reminder, open Notification Permission, open One-Click Reminder
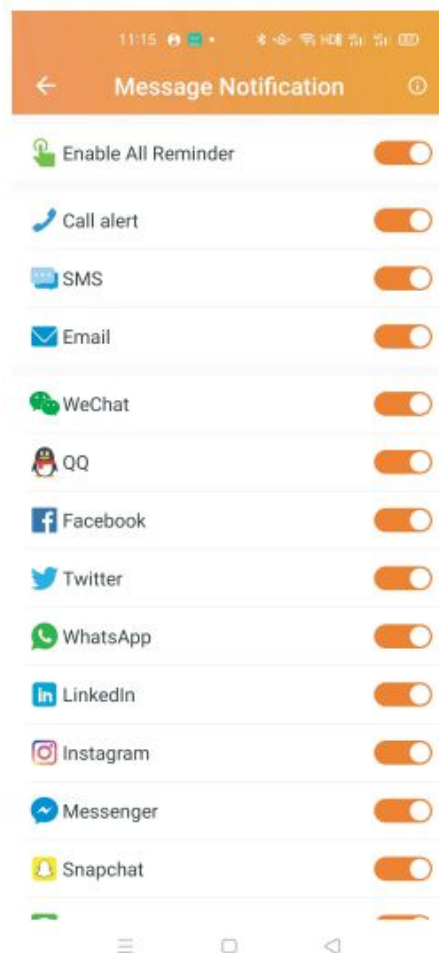

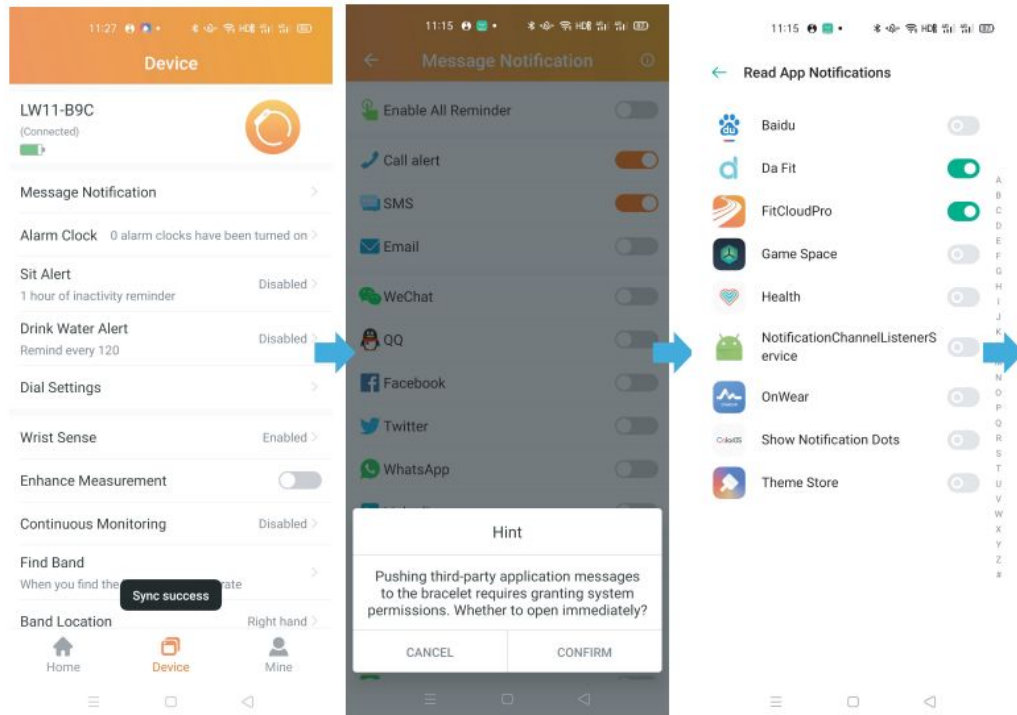

To set notification reminders on an iOS phone do the following: During the process of binding the device, a system pop-up will appear and click Pairing, go to Message Reminder, open Notification Permission, open One-Click Reminder.
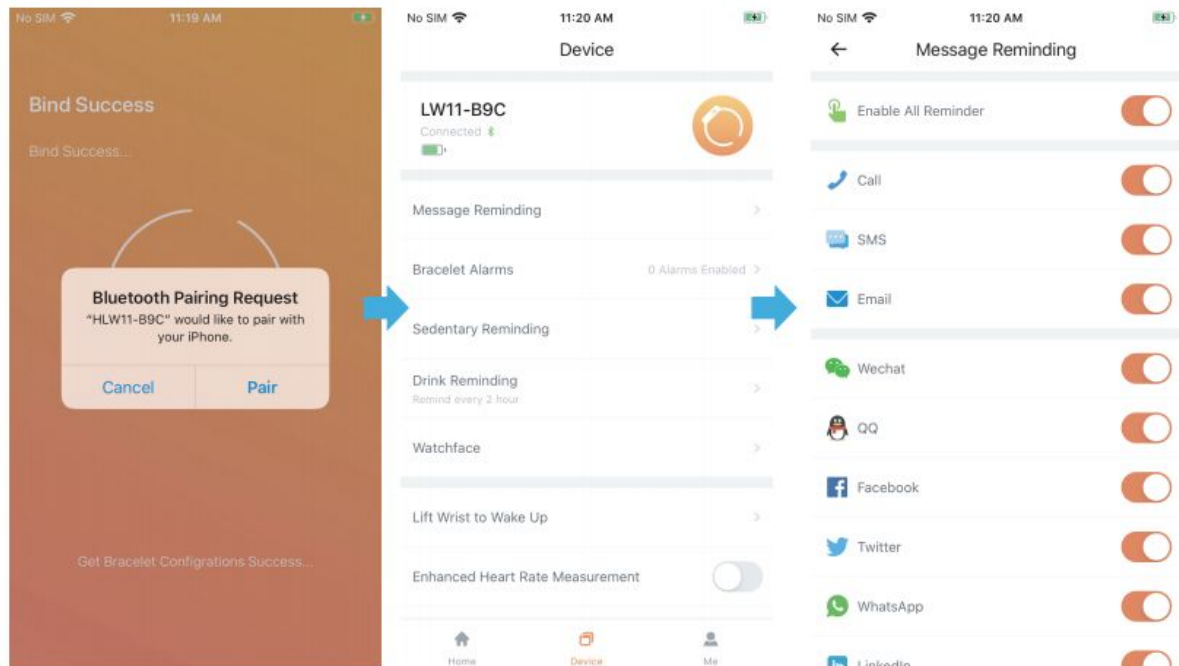

Smartwatch operation

Exercise data: click the data icon to enter the Exercise Data interface to view the daily steps, distance traveled and calories burned.

Information: After the watch is connected to your phone, the newly popped-up information will be pushed to the watch. The smartwatch can save up to 15 unread messages.

Weather: After the watch is connected to the phone, the weather will be automatically synchronized.

Health monitoring: You can measure heart-rate, blood pressure, and blood oxygen. The measurement lasts about 30-60 seconds. You can also monitor your sleep. All the data will be synchronized with the app on your phone.

Sport mode: here you can select various sports modes, like walking, running, mountain climbing, cycling, basketball, yoga, elliptical machine.

Stopwatch: Tap Play to start the countdown, tap again to pause, and the circular arrow to restore.

Music: Open to control the music player on your phone.

Brightness adjustment: Option in the Settings to adjust the brightness of the smartwatch.

Dial switch: Long-press to switch the dial style. The watch has 4 built-in dials.
