Batteries installation

To install the batteries to the remote controller open the battery cover on the back of the remote. Insert three 1.5V AA batteries in accordance with the instructions on the battery box.
To battery of the drone is rechargeable so follow the next steps to charge it correctly:

1) Insert the included USB cable into the USB port of the computer or power adapter (not included) and the indicator will light up.
2) Remove the battery from the drone and connect the battery plug to the USB charging cable.
3) The indicator on the battery will light up and it will turn off when the battery is charged.

The operation and control of the drone

The left analog controls the rising and falling of the drone and also turning the drone left and right.

The right analog controls moving the drone forward and backward and also flying to the right and to the left.

There are two speeds of flying: low level (30%) and high level (100%). You can change the flying speed mode using the switch button.
