- Lens angle: about 90-degree wide-angle
- Power interface: USB
- Input voltage: 5V
- Cable length: 1.5m

Setup instructions

The first step of the installation is to plug the camera into the USB port of your computer and clip it on the monitor or place it on the desk. When you plug in the camera, the drivers will install automatically. It's a simple Plug and Play camera.

To see the camera picture you have to open the camera window or some social media software, like Skype, Zoom, Meet, etc. Adjust the camera focus manually until you get the clearest picture. The microphone is turned on automatically with the camera is active.

Please note that if you're using Windows 7 or Windows XP, you'll need to install MyCam software. You can download it here: <https://mycam.en.softonic.com>.
