

## User Manual for In-Ear Mono Bluetooth 4.1 Headset T9

### Specifications

- Bluetooth: v4.1
- Bluetooth range: up to 10m
- Battery: 80mAh
- Charging time: about 1,5 hours
- Standby time: about 300 hours
- Working time: up to 8 hours

### Pairing the headset with your device

There are two methods for pairing this Bluetooth headset with your device:

1. The first method is when the headset is powered down. You have to long-press the multifunction button until the red and blue light start flashing alternately. The flashing means that the headset's Bluetooth is on and ready to pair.
2. The second method is when the headset is in sleep mode. Press the multifunction button, and blue light will start flashing. That means that the headset is ready to pair.

When you turn on Bluetooth on the headset, pair it with your device. The default pairing code is "0000".

### Controlling calls

- To answer a call simply short-press the multifunction button.
- If you want to reject a call, press multifunction, Volume up and Volume down buttons at the same time. Release the buttons to reject the call when you hear beep sound or voice prompt.
- During a call, short-press the multifunction button to hang up. For increasing or decreasing volume during a call, press Volume Up or Volume Down buttons.
- Short-press the multifunction button twice to redial the last number.

## **Controlling music**

When listening to music, short-press Volume Up and Down buttons to increase or decrease volume. If you want to change to a next song long-press the Volume Up button, and if you want to change to the previous song long-press the Volume Down button. To Play/Pause music short-press the multifunction button.

## **Charging the headset**

You can use your own charger to recharge the headset. But before charging, please check if the specifications of the charger meet the requirements of the headset (DC 5V, 100mA - 500mA). Be aware that if the charging voltage is very high, you can damage the headset.
